

COL334

Assignment 2

Sayam Sethi

September 2021

Contents

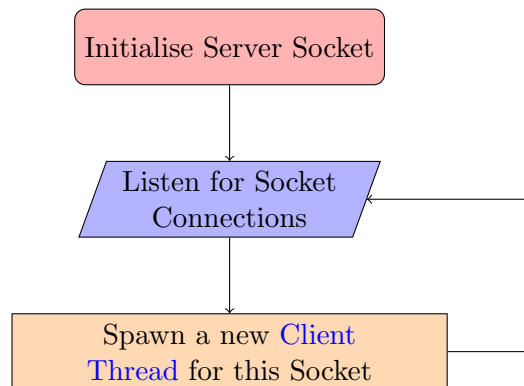

1 Preliminaries	1
2 Server.java	1
2.1 Client Thread	2
3 Client.java	3

1 Preliminaries

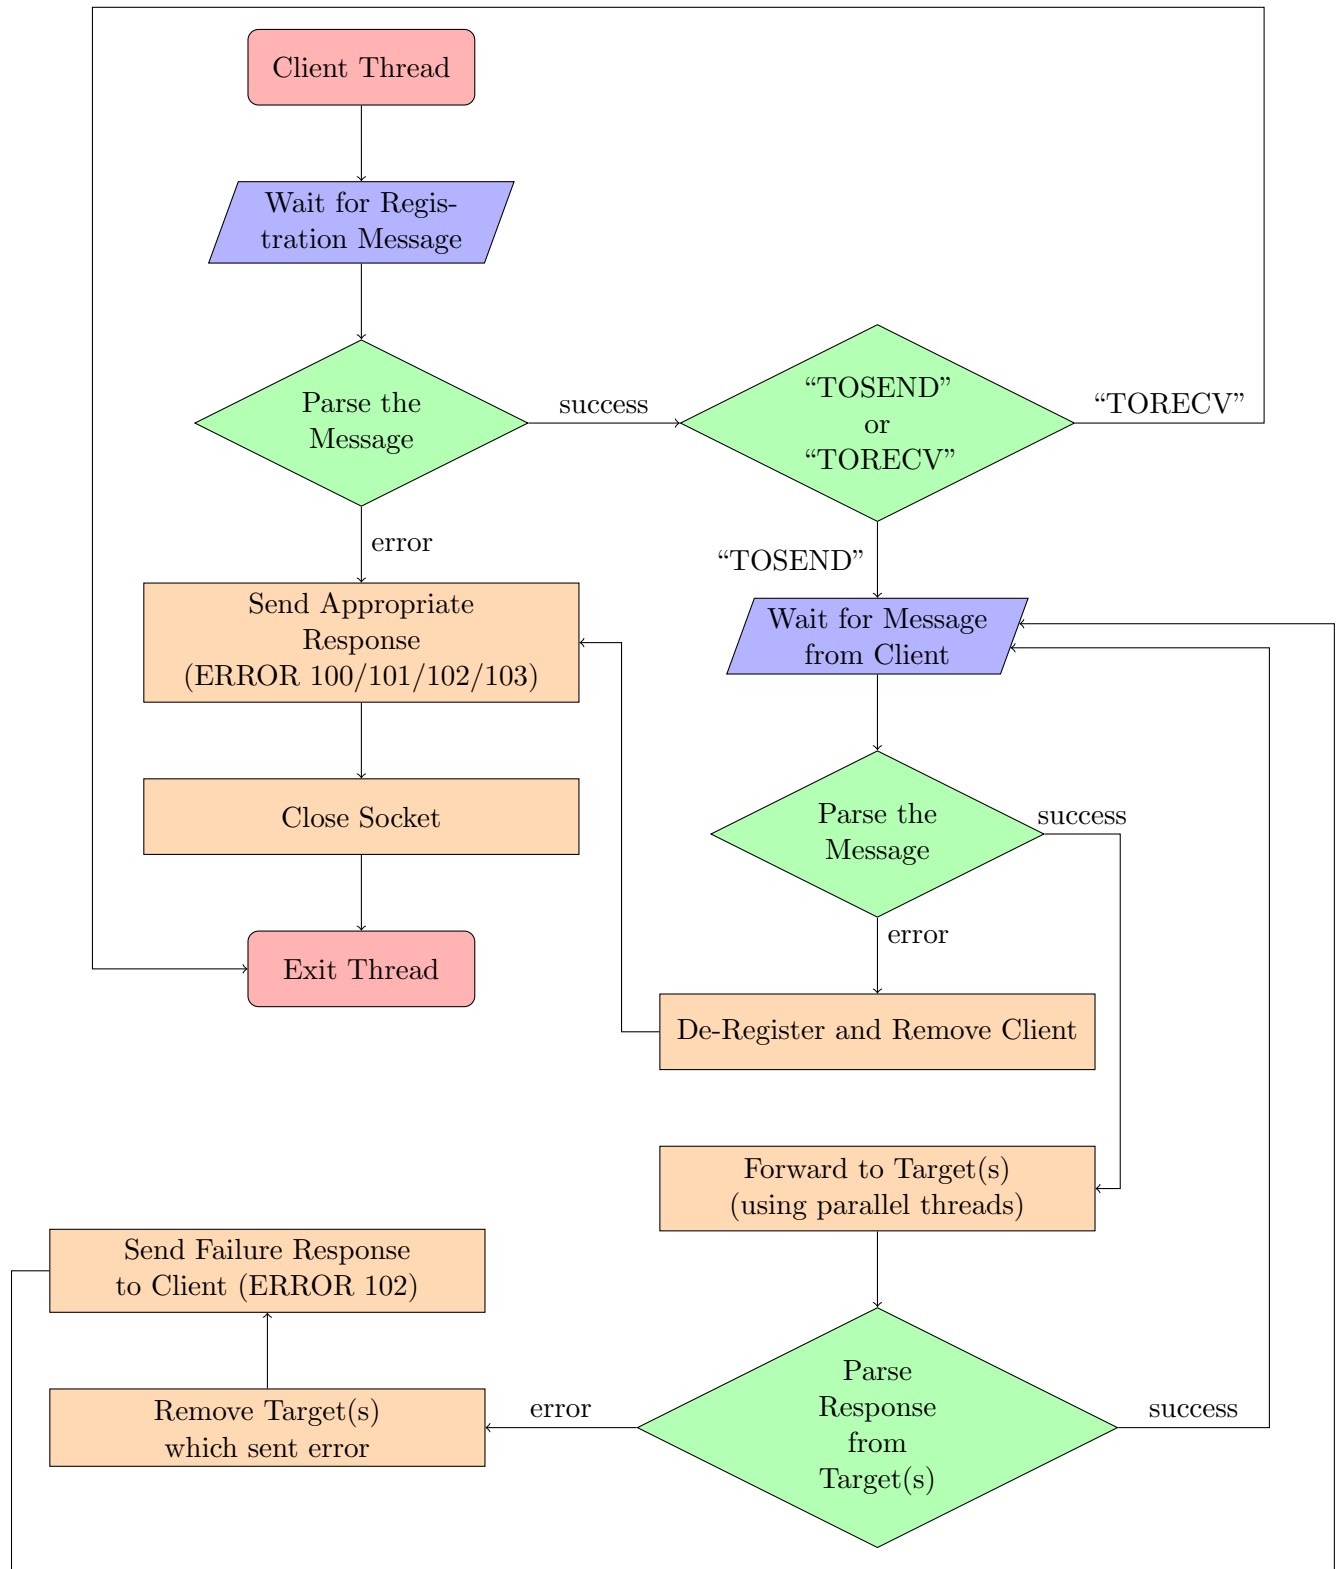

The language used is **Java** since it offers cross-platform compatibility which is dubious in **C++** since there is no *standard* library for socket programming. This might lead to incompatibility when running the code on a platform different from the one it has been implemented on. **Java** is better than **python** since **python** is a relatively slower language and networking applications need to be quick to deliver the best performance.

2 Server.java

The logical flow of the server is given as follows:

2.1 Client Thread

3 Client.java

The logical flow of the client is given as follows:
